Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices:  1. Financial 2. Healthcare 3. IT	FInancial
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	In the model_evaluation.ipynb file, the Meta Llama 2 7B model responded positively to financial data inputs, generating coherent and contextually relevant outputs related to financial forecasting and market trends.
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	After fine-tuning the Meta Llama 2 7B model in the financial domain using specific datasets and parameters, the model's responses in the model_finetuning.ipynb file showed enhanced accuracy and nuanced understanding of financial terminology and predictions. The outputs were more refined and aligned closely with expected financial outcomes.
